From: Dr. Gail M. Morrison, Director of Academic Affairs and Licensing

Annual Report on the
Academic Common Market Program
FY 2007-08

Established in 1974 by the Southern Regional Education Board (SREB), the Academic Common Market program was designed "to share between states specified degree programs located at southern public colleges and universities through an exchange of students across borders at in-state rates." As a cooperative agreement among states, the Academic Common Market seeks to eliminate unnecessary duplication of degree programs among states while supporting those programs which are able to serve additional students. The Market allows certified residents of the 16 participating states (Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia) to pay in-state tuition rates while enrolled in certain degree programs at participating out-of-state colleges and universities. Florida, North Carolina, and Texas participate at the graduate level only.

Since one of the goals of the Academic Common Market is to provide access to degree programs not available in the home state, each participating state compiles its own list of programs for access by its residents. In accord with SREB policy, eligible programs are those undergraduate and graduate programs which are at least 50 percent different in course content from programs offered in the home state. Concentrations, options, tracks, or specialization within more general (and otherwise ineligible) degree programs must be extraordinary, specific, and structured to merit eligibility for the Academic Common Market. During annual reviews, each state's Academic Affairs Director decides whether new programs should be added and whether any should be removed. In South Carolina, the Academic Common Market institutional coordinators at all the public institutions are asked to review the new programs before a decision is made. In addition, students can request inclusion of other programs throughout the year.

In South Carolina, interested students must contact the Commission on Higher Education for access to the Academic Common Market (ACM). This process involves two steps. First, Commission staff must determine whether the student has satisfied the required **one-year** period of residence in the state. Secondly, the Commission staff must verify that the student has been admitted to one of the specific programs to which South Carolina residents have ACM access. These programs, 152 undergraduate and 197 graduate programs, are listed in **Attachment 1**. Once the student has been certified, the student retains Academic Common Market status as long as he or she remains enrolled in the same degree program on a full-time basis and retains South Carolina residency.

During the April 1, 2007, through March 31, 2008, period, South Carolina certified 120 state residents for participation in the Academic Common Market. In the same period 173 students from other states were certified for ACM programs at South Carolina institutions.

As seen in the graph below there is no discernable trend other than South Carolina continues to bring into the state more students than it certifies to go out-of-state and this number has increased slightly over the last three years.

During AY 2007-08, the majority of South Carolina Academic Common Market students were ACM certified for programs in Georgia (44) and Tennessee (32). In Georgia the most requested program was the Bachelor of Science in Medical Technology offered at Armstrong Atlantic University (23). In Tennessee the most requested program was the Bachelor of Science in Recording Industry (12) offered at Middle Tennessee State University. These were the two most popular ACM programs for South Carolina residents.

In Fall of 2007 South Carolina institutions had a total of 349 out-of-state students enrolled with Academic Common Market status. As in previous years, the South Carolina program with the most ACM students that semester was the Bachelor of Science in Marine Science program offered at Coastal Carolina University with a total of 163 students (**Attachment 2**).

The programs (84) currently made available through the Academic Common Market by South Carolina institutions and the states that have ACM access to those programs are listed in **Attachment 3**.

To advertise this valuable program, which costs the state nothing, the Academic Common Market program information was transmitted electronically this fall to over 250 high school guidance counselors.

This report is being presented for information only.

***SREB Academic Common Market
AY 2008 - 09***

The State of South Carolina has made arrangements for its residents who have been formally accepted into one of the following programs to have access through the ***Academic Common Market*** for the 2008-2009 Academic Year. This list changes as programs are added and removed. For more information, please call (803) 737-2245.
