

**New Program Proposal
Master of Science in Nursing, Clinical Nurse Leader
University of South Carolina Upstate**

Summary

The University of South Carolina Upstate requests approval to offer a program leading to the Master of Science degree in Nursing, Clinical Nurse Leader, to be implemented in Fall 2014. The proposed program is to be offered through online instruction. The institution currently offers a program leading to the Bachelor of Science degree in Nursing. The following chart outlines the stages for approval of the proposal. The full program proposal **is attached**.

Stages of Consideration	Date	Comments
Program Planning Summary received and posted for comment	11/1/2010 (initial) 8/5/2012 (revised)	Staff suggested strengthening the justification and need sections by including more data, specifically state and regional data, to support the need for the proposed program and discussing in more detail the planned collaboration with USC Aiken.
Program Planning Summary considered at ACAP	10/11/2012	ACAP members suggested adding more information about availability of clinical sites. CHE staff encouraged USC Upstate to collaborate with Lander rather than offer a competing program.
Program Proposal Received	2/25/2013	The institution was allowed to submit the proposal after the deadline so that MSN CNL programs proposed by USC Upstate and Lander could be considered by ACAP and CAAL at the same time.
Comments and suggestions from CHE staff to the institution	2/25/2013	Staff suggested revising the faculty table for consistency; discussing the electronic library resources available to students since the proposed program will be offered online, including listing a selection of nursing titles and databases available to students online; identifying reallocated funds; and describing communications with Lander regarding possible collaboration.
Revised Program Proposal received	2/26/2013	Revisions to information provided about faculty, library resources, clinical sites, and possible collaboration.
Program Proposal posted to ACAP members for review	2/28/2013	
ACAP Consideration	3/21/2013	ACAP members discussed the issue of collaboration with Lander's proposed program at length and ultimately decided that collaboration was not necessary because of sufficient demand to support both programs.

Stages of Consideration	Date	Comments
Program Proposal posted to CAAL members for review	4/16/2013	
Comments received from CAAL Members	4/24/2013	Commissioner Munns asked questions concerning collaboration and transferability of courses. Staff requested that the institution address these issues, received responses, and distributed the information to CAAL. Lander and USC-Upstate propose to offer the same program, both of which will be offered online. Discussions among institution officials, the staff, and ACAP document concerns about the duplication of the programs and possibilities for collaboration.
Responses provided to CAAL	5/1/2013	Responses addressed the items listed and are attached. Staff and Lander officials described discussions regarding collaboration and justification, based on interest in the program, for both institutions offering the same program independent of each other. USC-Upstate has already entered into a collaborative agreement with USC-Aiken where USC-Aiken faculty will teach two courses in the program. USC-Upstate states that collaboration between the two USC institutions is more beneficial and demand for CNL nurses justifies the need for programs at both Lander and USC Upstate.
CAAL consideration	5/2/2013	CAAL and institution representatives further discussed the value of collaboration for better use of state and institution resources. The Committee requested that institution officials of Lander and USC-Upstate discuss ways in which to collaborate given the resources at each institution. The Committee voted to recommend approval to CHE.
Revised Program Proposal Received	5/5/2013	The revised proposal includes a discussion about Lander's program and possible collaboration.
Signed MOU Received	5/23/2013	Lander submitted a Memorandum of Agreement (attached) of collaboration with USC-Upstate to share a clinical site database, contact information for sites and names of preceptors, and on-site supervisory visits.

Recommendation

The Committee on Academic Affairs and Licensing commends favorably to the Commission approval of the program leading to the Master of Science degree in Nursing, Clinical Nurse Leader, at USC Upstate to be implemented in Fall 2014, provided that no additional “unique cost” or other special state funding be required or requested.

**Commissioner Munns' Questions and CHE/Institutional Responses:
University of South Carolina Columbia, M.S.N., Clinical Nurse Leader
Program Proposal**

Collaboration. Landers proposal states that collaboration and MOU's would be useful and productive, BUT this proposal does not discuss Lander and only says that the school anticipates collaboration with Aiken. Would USC Upstate agree to a program approval restriction saying that approval is contingent on MOU's detailing collaboration around the Upstate and Midland SC schools?

Staff response: provided for Lander, MSN Clinical Nurse Leader.

Institute response: Prior to the ACAP meeting on 3/21/13 it was recommended by the CHE staff that Lander and USC Upstate consider collaboration. We engaged in a conference call to explore possibilities. Discussion regarding developing an MOU and seeking other ways to share information resulted. This verbiage was added to each proposal prior to the presentation at ACAP. However, at the ACAP meeting each program was approved independently of each other based on the fact that other programs across the state have been approved with no stipulations regarding collaboration and there are documented shortages of advanced practice nurses in South Carolina and more graduate programs are needed. USC Upstate removed the language regarding collaboration and MOU with the understanding this was no longer a requirement. No other discussion with Lander has taken place, before or since this conference call, yet it appears they left the language regarding collaboration in their proposal.

The collaboration with USC Aiken has been evolving for over a year through discussions between the deans of both schools and faculty review of the program proposal through several revisions. Faculty at USC Aiken are currently working on two courses and plan to teach them in the first semester of the program. The courses will be USC Upstate's and USC Aiken faculty will be teaching them as part of their workload. USC Aiken was chosen for partnership as a sister school in the USC system with ease of system wide support, resources and technology.

We suggest that a program approval restriction contingent upon MOUs detailing collaboration around the Upstate and Midland SC schools is not needed. Nursing is very different from the liberal arts and while the end result in a master's program is advanced expertise, each program is extremely unique in that it evolves from the philosophy and vision of the school and collective faculty expertise. The critical shortages that both our programs seek to address are most effectively dealt with by allowing each program to operate independently, while we seek ways to capitalize on our respective resources.

I would appreciate the opportunity to address the CAAL member's concerns directly at the meeting on Thursday. Thank you for your support in this endeavor.

Transfer of courses. Will the program courses and the degree program be reflected in SCTRAC so that students can easily substitute courses and transfer programs? Would USC Upstate agree to this language as a precondition of approval?

New Program Proposal

**University of South Carolina Upstate
Mary Black School of Nursing**

**Master of Science in Nursing
Concentration: Clinical Nurse Leader**

May 5, 2013

Thomas Moore, Chancellor
University of South Carolina Upstate

Harris Pastides, President

Classification

Program Title: Master of Science in Nursing

Concentration: Clinical Nurse Leader

Academic unit: Mary Black School of Nursing

Designation, type, and level of degree: Master of Science in Nursing

Proposed date of implementation: August 2014

CIP code from the current USDOE's Classification of Instructional Programs: 51.3820

Identification of Program as New or Modification: New

Site: University of South Carolina Upstate

Program qualifies for supplemental Palmetto Fellows Scholarship and LIFE Scholarship awards: Yes _____ No: X_____

Delivery mode: Online didactic; onsite clinical

Area of Certification: Clinical Nurse Leader Certification through the Commission on Nursing Certification (CNC)

Institutional Approval and date of approval

1. School of Nursing Graduate Committee	<u>Dr Angie Davis</u>	<u>1/7/13</u>
2. School of Nursing Faculty	<u>Dr. Katharine M. Gibb</u>	<u>1/28/13</u>
3. Academic Affairs Committee	<u>Dr. Jeannie Chapman</u>	<u>3/1/13</u>
4. Faculty Senate	<u>Dr. David Ferris</u>	<u>3/29/13</u>
5. Senior Vice Chancellor	<u>Dr. Charley Harrington</u>	<u>4/1/13</u>
6. Chancellor	<u>Dr Thomas Moore</u>	<u>4/1/13</u>
7. President Pastides	<u>Dr. Harris Pastides</u>	<u>3/8/13</u>
8. Board of Trustees	_____	<u>4/17/13</u>

Purpose

- a. This professional program prepares graduates to assume Clinical Nurse Leader positions in a variety of health care settings. The program is designed for RNs who hold the BSN degree.

b. Program Objectives

Graduates of this program will be able to:

1. Integrate best current evidence with clinical expertise and patient/family preferences and values for the delivery of optimal health care across diverse settings.
2. Use data to monitor the outcomes of care processes and use improvement methods to design and test changes to continuously improve the quality and safety of healthcare systems and minimize risk of harm to patients.
3. Apply research outcomes within the patient care setting to resolve practice problems, work as change agent and disseminate results.
4. Use information and technology to communicate, manage knowledge, mitigate errors and support decision making.
5. Intervene at the system level through policy development and employs advocacy strategies to influence health and health care.
6. Function effectively within nursing and inter-professional teams, fostering open communication, mutual respect, and shared decision-making to achieve quality patient care.
7. Recognize the patient or designee as source of control and full partner in providing compassionate and coordinated care based on respect for patient's preferences, values, and needs.
8. Influence healthcare outcomes at an advanced level of understanding of nursing and relevant sciences and integrates this knowledge into practice.

Justification

a. Need for the Program in South Carolina

USC Upstate is a thriving metropolitan university with a strong relationship with the surrounding cities, their connecting corridors, and expanding populations. The University is recognized for its experiential learning, regional and global partnerships, employment opportunities, cultural diversity, and dynamic community activity. Graduates of the proposed Master's program will be prepared with a comprehensive knowledge base and practice expertise that magnifies the baccalaureate entry level of practice.

In a consensus policy statement on the "Educational Advancement of Registered Nurses" released in May 2010, the Tri-Council organizations agree that a more highly educated nursing profession is no longer a preferred future - it is a necessary future in order to meet the nursing needs of the nation and to deliver effective and safe care. The Tri-Council stated:

"There are currently too few nurses choosing to advance their education. First is a need for education advancement to the baccalaureate level then to the graduate level to meet the urgent need for Advanced Practice Registered Nurses (APRNs) and nurse educators. Current healthcare reform initiatives call for a nursing workforce that integrates

evidence-based clinical knowledge and research with effective communication and leadership skills. These competencies require increased education at all levels. At this tipping point for the nursing profession, action is needed now to put in place strategies to build a stronger nursing workforce.” (AACN Media, July, 2010).

The recently released Institute of Medicine (IOM) report, *The Future of Nursing* (Oct. 2010), calls for higher levels of education and training for nurses through an improved education system that promotes seamless academic progression.

There is a growing need in the Upstate for practicing nurses to be prepared at the Master’s level to assume the roles of faculty, leadership, and care provider at the bedside. In South Carolina, only 8.2% of RNs hold advanced degrees in nursing or higher (http://www.sc.edu/nursing/centers_institutes/center_nursing_leadership/office_healthcare_workforce_research/2011nursefactsheet.pdf), which is 5% lower than the national average. Nurses in the Upstate who desire to advance their education as a nurse generalist are forced to choose enrollment in out-of-state master’s programs. Clemson University offers several specialist graduate options, primarily using a classroom environment that currently enjoys capacity enrollment. USC Columbia and MUSC offer online specialist graduate courses, primarily nurse practitioner focused, that are not fully utilized. The Clinical Nurse Leader who graduates from USC Upstate will be able to assure consistency of care using point-of-care strategies of risk anticipation and risk assessment to design, implement and evaluate the effectiveness of those plans of care. Through an interdisciplinary approach, the CNL will coordinate care, reducing the fragmentation and ensuring seamless and safe care. The CNL will evaluate and implement evidence based research to be used in developing strategies to improve outcomes at a point-of-care level and identify problems to achieve new knowledge through participation in clinical research.

Answering the call of the IOM for improved communication, collaboration, safety standards, and client-centered care, the CNL focuses on the delivery of care to prevent fragmented and discontinuous care. The CNL will use strategies to design, implement and evaluate activities to optimize a safe health care environment. These strategies will impact risks associated with challenges such as medication errors, falls, hospital acquired infections, and readmission related to ineffective discharge planning.

There currently are no other health care professionals academically prepared to fulfill this role in the state of South Carolina. This innovative role provides nursing leadership at the point-of-care in a variety of healthcare settings and educational institutions and within diverse geographical locations throughout the Upstate and beyond.

The CNL, with a broad-based graduate nursing education, assesses risk, designs and implements plans of care, and provides oversight of the care delivery and outcomes for individuals, families and/or populations. CNLs do not fill the traditional role of nurse managers or other Master’s prepared nurses but rather are expert bedside and/or community practitioners who provide leadership and problem-solving skills in addressing client health care outcomes. Other Master’s in nursing programs do not focus on bedside nursing care and outcomes, but on specialty areas or advanced practice.

The CNL uses evidence-based information to improve clinical and environmental care outcomes and effect change in health care organizations. The CNL functions as part of an interdisciplinary team by communicating, planning, and implementing care directly with other health care

professionals, such as physicians, pharmacists, social workers, clinical nurse specialists, and nurse practitioners.

According to Cathy Rick, chief nursing officer of the Veteran's Hospital, CNLs have been embraced by the Veteran's Health Administration, which plans to implement the role at all sites nationwide by 2016. Currently about one-third of its facilities employ CNLs. In addition, the rising trend of hospitals seeking magnet status will increase the demand for clinical experts at the bedside because hospitals are finding that CNLs are experts in cost-effective resource utilization and streamlining quality care while avoiding pitfall complications such as pressure ulcers and hospital-acquired pneumonia.

The diversity of South Carolina's population requires health care providers to be knowledgeable and competent in caring for this disparate population and to understand the impact that global health has on the health of South Carolinians. The Clinical Nurse Leader will have the skill to recognize the challenges of working with a multinational population and will have the knowledge to address the issues related to cultural competence and ethical dilemmas that may be derived from cultural differences. The CNL realizes that disease and illness have no borders and will be attuned to global health issues that can impact everyone. Letters of support from area hospitals are included in Appendix A.

Anticipated Program Demand and Productivity

An online survey was conducted in spring 2012 of registered nurses employed at four hospitals in the Upstate. 401 responded to the survey and of those 85% expressed high interest in pursuing a Master's degree at USC Upstate. 51% prefer an online modality for didactic while 43.5% prefer blended learning. Only 20.4% stated they would be able to attend full time and 79.6% prefer part time. 33.8% range in age from 26-35; 26.4% range from 36-45 and 22.1% range from 46-55. 97% indicated they are South Carolina residents. In January 2013 an online survey was sent to the 540 enrolled students at USC Upstate in both the pre-licensure and RN-BSN tracks with 316 responses. Of those who responded 93% are interested in pursuing the MSN and 86% would prefer the CNL at USC Upstate. Thirteen percent of the respondents are RN-BSN and the remaining 87% are pre-licensure. Ninety-nine percent are South Carolina residents. Surveys are included in Appendix B.

In the first year of the program, 18 RN students will be accepted, with anticipated graduation in two years full-time and three years part-time. Approximately two hundred students graduate from the USC Upstate baccalaureate nursing program annually, providing a rich source of potential graduate students who currently seek graduate education elsewhere. In addition, there are several baccalaureate programs in the Upstate whose graduates have expressed interest in this program, along with RNs employed in Upstate healthcare systems.

b. The centrality of the program to the mission of the institution

As a senior public institution of the University of South Carolina with a comprehensive residential campus in Spartanburg and commuting and degree completion operations at the University Center of Greenville, the University's primary responsibilities are to offer baccalaureate education to the citizens of the Upstate of South Carolina and to offer selected Master's degrees in response to regional demand. The University of South Carolina Upstate aims to become one of the Southeast's leading "metropolitan" universities...a university that acknowledges its fundamental reason for being as its relationship to expanding populations along the I-85 corridor.

The primary mission of the Mary Black School of Nursing is to serve the citizens of Upstate South Carolina by providing education programs that are of the highest quality. By offering the Master of Science degree in Nursing (MSN), a frequently requested degree, the University and the School will more completely fulfill its mission of meeting the needs of the citizens of Upstate.

c. **Relation of the proposed program to existing programs at the proposing institution**

At this institution the Master of Science in Nursing program is unique. The Mary Black School of Nursing has an established pre-licensure baccalaureate nursing program as well as a large RN-BSN program which provides a rich source of potential students for the graduate program.

d. **List of similar programs in the state and nation-**

There are 31 online programs for the CNL across the nation (AACN, 2013, <http://www.aacn.nche.edu/cnl/about/cnl-programs>). Many of these are only partially online, but the website does not differentiate which programs are totally online from those that are partially online. The online programs are as far west as the University of San Francisco, as far north as the University of New Hampshire, and as far south as the University of Florida. The Midwest is well represented with Ohio having five online programs, the most of any state. Some of the programs have restrictions as to who can attend, with requirements varying as to who is your employer, such as the University of Florida, which restricts its program to VA nurses only for their online program or being in-state residents only. There is not an online program in every state with a CNL program. Only twenty states of the thirty-six states that have Clinical Nurse Leader programs have an online program. Of the states included in the Southern Regional Educational Board Academic Common Market, only the University of South Alabama, University of Alabama, University of Florida (limited to VA employees if out of state applicants) and University of West Georgia offer a CNL program

e. **Similarities and Differences between the proposed program and other programs**

The proposed Master of Science in Nursing with an emphasis on the CNL is uniquely designed to prepared advanced practice generalists for the clinical leadership positions and meet the needs of the population of the Upstate of South Carolina and surrounding area. According to Spartanburg Regional Healthcare System, because there is a lack of non-Nurse Practitioner Master's programs in the state, they have over 60 nurses who have or are attending Gardner Webb University's nursing master's program, a private institution out of state. Other universities in the state offering a Master's program are focused on definitive specialties and could not adapt to the academic and clinical specifications of the CNL as outlined by the AACN. Lander University is also proposing a MSN with focus on the CNL.

Relationship of the proposed program to other institutions via inter-institutional cooperation

We anticipate collaborating with USC-Aiken in the offering of core courses and combining our faculty resources to provide optimal education for our students. Faculty at USC Aiken will be teaching NURS 700 and 702 in the first semester and USC Upstate faculty will teach NURS 701 and 703. USC Aiken faculty are licensed in Georgia and could assist in student placement in that state since it is not a part of the RN licensure compact, thus increasing our applicant pool for that area. We are engaging in discussions with Lander University to explore ways to capitalize on our resources in a collaborative effort.

Admission Criteria

- a) Successful completion of the BSN degree from an accredited college or university and possessing an unencumbered license as a registered nurse.
- b) Minimum GPA of 3.0 on a 4.0 scale for the baccalaureate degree.
- c) Licensure must be in South Carolina or any state that participates in the Multi-state Nurse Licensure Compact enacted in 2006 (www.ncsbn.org)
- d) Completion of agency requirements needed for clinical practice.
- e) Transfer work from any CCNE accredited master's program may be considered if taken within six years prior to USC Upstate degree completion. A maximum of twelve semester credit hours within the USC system (nine from another institution outside the USC system) may be considered. Courses must be documented by an official transcript clearly indicating that graduate credit was awarded and must be approved by the Dean of the School of Nursing. Courses graded lower than B are not transferrable.
- f) Two letters of recommendation from current employer or faculty.

Enrollment

Table A-1 Total Enrollment

PROJECTED TOTAL ENROLLMENT				
YEAR	Fall		Spring	
	Headcount	Credit Hours	Headcount	
2014 - 15	18	198	18	162
2015 -16	36	360	36	324
2016 -17	51	360	51	324
2017 -18	57	360	57	324
2018-19	60	360	60	324

We anticipate approximately 9 full-time students and 9 part-time or any combination of the above the first year, with increasing numbers of 12 full-time and 12 part-time in the second year and beyond. Potentially our part time students will be significantly higher than those attending full time. We do not anticipate any transfers from other degree programs within the university. All students must have a baccalaureate in nursing and be licensed as a registered nurse.

Course Descriptions - All courses are new

NURS 700. Theoretical and Conceptual Foundations for Nursing (3) Exploration of various nursing theories and the utilization of nursing theory to health care delivery and to the role of the advanced practice nurse. Nursing theory and its relationship to providing comprehensive and holistic nursing care is investigated. Prerequisites: Admission to program.

NURS 701. Health Promotion and Advanced Health Assessment (3) Comprehensive advanced holistic health assessment skills based on the integration of advanced theoretical and empirical knowledge necessary to identify health needs and risks. Emphasis will be placed on the differentiation between normal and abnormal findings, integration of laboratory findings and diagnostic reasoning analyses for clinical decision making, incorporating the principles of health promotion. Prerequisite: Admission to program.

NURS 702. Advanced Pathophysiology (3) Examination of the pathophysiological basis of disease processes. Advanced pathophysiological concepts for all body systems as a foundation for clinical decision making and nursing management by the advanced practice nurse is included. Prerequisite: Admission to program.

NURS 703. Cultural Perspectives in Healthcare (2) Emphasis on understanding the ways cultural, ethnic, socioeconomic, linguistic, spiritual, religious and lifestyle variations are expressed. Attention is directed at increasing the capacity of health care professionals to develop culturally sensitive health care systems. Prerequisite: Admission to program

NURS 710. Nursing Research Methods (3). Prepares advanced practice nurses with skills and knowledge needed to use nursing research to provide high quality nursing care, initiate change and promote evidence based practice. Evidence based practice models will be used for the evaluation and application of scientific knowledge surrounding practice issues. Prerequisite: NUS 700.

NURS 711. Health Care Delivery Systems (2). Examination of health care policy organization and finance. Explores the role of the advanced practice nurse in providing high quality, cost effective care and addresses issues related to the delivery of healthcare. Prerequisite: NURS 700.

NURS 712 Role of the Nurse as Leader (3) Leadership in the healthcare delivery system across all settings. The definition and role of the transformational nurse leader will be explored as well as implementation across various settings. Fundamental aspects of nurse leadership will be expanded upon to prepare the graduate for this multifaceted responsibility. Prerequisite: NURS 700

NURS 713 CNL Practicum I (1) Introduces the CNL role as clinician, outcomes manager, client advocate, educator, information manager, systems analysis, team member and lifelong learner. CNL portfolio is initiated. Minimum of 75 clinical practicum hours is required. Prerequisite 700; Pre or co-requisite 712.

NURS 715. Global Healthcare (2) Immersion experience in an international or national setting. Exploration of the interplay of culture, public health, ethics, social justice, policy, and models of health care delivery in a global perspective. Course will require travel and related expenses. Prerequisite: Admission to program

NURS 720. Advanced Applied Pharmacology (3) Comprehensive review of pharmacological concepts and principles. Focuses on use of pharmacotherapeutics in the treatment of disease and health promotion. Prerequisite: Admission to program

NURS 721 Quality and Risk Management in Health Systems Leadership (2) Application of leadership principles to clinical quality and risk management. Emphasis is placed on clinical judgment and decision making skills in illness management, health restoration and risk reduction in prototypic health care problems/ Prerequisite NURS 711 & NURS 712.

NURS 722 Data Analysis in the Healthcare System (2) Examination of appropriate data analysis techniques to various research designs. An overview of health information systems that are utilized to develop patient data sets and safeguard privacy is provided. Prerequisite: NURS 710; Co requisite NURS 721

NURS 723 Evidence Based Practice Project I (1) Provides an opportunity for students to address problems in health systems leadership education using evidence based approaches. Prerequisite NURS 710; pre or co requisite NURS 722

NURS 724 CNL Practicum II (1) Transition of students into the CNL role as clinician, outcomes manager, client advocate, educator, information manager, systems analysis, team member and lifelong learner. The student functions under the guidance of a faculty member and clinical preceptor with emphasis on microsystem assessment. Continuing documentation for the CNL portfolio. Involves 75 clinical hours. Prerequisite 711, 713; pre or co-requisite NURS 720.

NURS 730 Outcomes Evaluation in Healthcare Systems Leadership (3) Accountability for health care outcomes for specific groups of clients within a unit or setting. Application of research is utilized to implement and evaluate plans of care. Relevant factors are synthesized to evaluate and achieve optimal patient and outcomes. Prerequisite: NURS 711, 712, 721,722

NURS 731 Evidence Based Practice Project II (2) Culmination of evidence based practice project initiated in previous semester. A final portfolio document that verifies the development and competency of the student in the CNL role. The portfolio records the student's achievements. Prerequisites: NURS 723, 724; Co Requisite 732.

NURS 732 CNL Practicum III (4) Immersion experiences in the role of the CNL. Involves 300 clinical hours. Prerequisite: NURS 720, 722, 723,724; pre or co requisite NURS 730; co-requisite NURS 731.

Assessments:

- Students will be evaluated by research papers and projects, completion of progressive portfolio, clinical performance and outcomes of experiences
- Programmatic assessment will focus on:
 - a. retention and graduation rates - goal 90%
 - b. success rates on the CNL certification examination - goal 95%
 - c. employment rates - goal 100%
 - d. completion of program within six years

V. Faculty

Qualifications for New Faculty

New Faculty must meet the qualifications for nursing faculty as specified in the South Carolina Code of Regulations 91-11 C.2:

The academic and experience qualifications of the faculty are appropriate to support the goals and objectives of the nursing education program. Faculty appointed prior to June 30, 1992 and serving continuously since that time are recognized as meeting the academic and experience requirements of this section.

- (a) All full and part-time faculty in the nursing program meet the parent institution's requirements for faculty appointment.
- (b) Faculty teaching nursing courses must meet all the following requirements:
 - (1) hold an unencumbered active license as a registered nurse in South Carolina or another Compact state;
 - (2) have a minimum of a Master's (or higher) degree in nursing; and
 - (3) have a minimum of two years of clinical experience as a registered or advanced practice nurse related to the primary area of responsibility.
- (4) All faculty teaching online have completed instruction in online teaching strategies and are certified to teach using distance modalities.

Proposed Changes in Assignment and Extent of New Positions

In the case of currently-employed faculty and administrators in the Mary Black School of Nursing, there will need to be changes in teaching assignments. It is anticipated that, with full faculty capacity and judicious use of adjunct faculty, there will be a need for one additional tenure-track faculty position in the second year of the new degree program. There will be no new administrative costs for the program, as it will be administered under the current organizational structure of the USC Upstate School of Nursing. Since faculty from USC Aiken and USC Upstate will each be teaching two of the first semester courses the need for additional faculty for Upstate does not exist at present and any additional faculty will be supported by tuition and fee revenue.

Institutional Plan for Faculty Development

The institutional plan for faculty development includes orientation for new faculty and a mentoring plan for junior faculty, which is organized by the MBSON faculty orientation/mentoring committee. Faculty development workshops and in-services are held on a regular basis and have included such topics as using wikis for distance learning, lateral violence in healthcare, and test analysis strategies. The University of South Carolina Upstate regularly conducts workshops for tenure track faculty and the Director of Research is available to mentor faculty, and the office of research provides financial awards to support faculty research. Faculty regularly attend conferences to present their scholarly work.

The Director of the Joint Center for Nursing Research and Scholarship, who holds a terminal degree in nursing, has been awarded the Jo Ann Sinclair McMillan Endowed Professorship for Advanced Nursing Study and attended the University of West Georgia to pursue her Post

Master's CNL (Clinical Nurse Leader) Certificate. She will take the certification exam in May 2013.

Institutional definition of full-time equivalents (FTE)

The University of South Carolina Upstate definition of full-time faculty for Mary Black School of Nursing faculty holding an instructor rank is 12 semester hours of teaching per semester.

Table B-1

USC UPSTATE			
List Staff by Rank (e.g. Professor #1, Professor #2, Associate Professor #1, etc)	Highest Degree Earned	Field of Study	Teaching in Field (Yes/No)
Professor #1	PhD	Nursing	Yes

Physical Plant

While this proposed program is delivered via distance education, the physical resources of the MBSON are sufficient to meet the program mission, goals and expected outcomes. Both campuses have teleconferencing capability, ECHO 360 video recording software and management systems, and Blackboard learning management system (LMS) for delivery of distance education. The Spartan GreenSky is an initiative USC Upstate to provide anywhere, anytime access to USC Upstate email, files and course-required software for all students, faculty and staff. Included in these services are email, cloud storage and virtual computer access. With Spartan GreenSky, users can access any of these services via any computer with Internet access, including access to nearly all computer labs and specialized software previously only available in specific computer labs.

The MBSON faculty located on the Greenville campus have been the recipients of several grants to create a web-based multi-user virtual environment (MUVE) hospital with a variety of learning modules and activities.

Currently, all full-time faculty on each campus have a private office with necessary office equipment (computer, printer access, filing cabinets, bookcases). Part-time faculty share offices and all are equipped with the same office equipment.

Equipment

There will be no new facility costs for this program as the MBSON is housed in adequate facilities and with spacious offices. Our campuses are equipped with technology to support distance learning. An allocation of \$5,000 for additional computer software, materials and technology enhancement are proposed for the first two years of start-up. The MBSON has a Center for Nursing Research that will be a rich support to our master's program.

Library Resources

The USC Upstate Library is housed in a multi-floor building shared with classrooms and other campus services such as the Scholars' Academy and ROTC. The Library occupies approximately 36,643 net square feet of space in a 61,739 square foot building (approximately 59% of the building). Library operations and services within the building include access services (circulation, reserves, interlibrary loan), the reference desk, three computer labs/classrooms (one of which is a 24/7 lab, technical services, library administration, library faculty offices, library staff workspaces, group study rooms and individual carrels, circulating collections and in-house use collections (including reference, archives, and special named collections).

The Library is open with full services 82.5 hours per week. Library hours (with no services) are extended by an additional two hours each night (Sunday through Thursday) through the use of University security officers. Although no services are offered, this does provide the students with a quiet and safe study environment an additional 10 hours per week. Finally the library's 24/7 computer lab is open 24 hours a day 7 days a week with the only closure being the holiday break between Christmas and New Year's when the entire campus is closed.

The Library's resources are available in a variety of formats, including 153,008 electronic books, 572 print journal subscriptions, over 146,462 print books, 48,584 microforms, and more than 7,413 CD/DVDs. In addition, the library has begun a digitization project and the following items are available digitally: all university yearbooks, all university catalogs, former SACS self-study and reaffirmation documents, and numerous student literary publications. As part of the University of South Carolina System, the library also provides students and faculty with access

to the system's 3.1 million books, 3.9 million microform items, and 24,000 current serials in print.

The University is a member of the statewide academic library consortia PASCAL (Partnerships Among South Carolina Academic Libraries). With its effective communication system and an efficient delivery system (PASCAL Delivers), over 6 million items in academic collections throughout the state are available to students within a few days. Both the main campus library and the library at UCG are pick-up and drop-off points for PASCAL materials. Whenever possible, electronic resources are added, as this equalizes the access for the distance learner as well as the onsite learner. Via subscription to more than 240 databases, the USC Upstate Library provides direct access to the full-texts of more than 36,000 journals. An [annotated list](#) of these databases is available on the library's website. All of these databases are available remotely using the campus proxy server. Nursing subject area databases are available [here](#). Faculty, staff and students may access these information resources from their homes, offices, residence hall rooms, etc. They do not have to enter the library to take advantage of these resources.

At USC Upstate Greenville campus, the F.W. Symmes Library and Media Center provides 6,144 square feet of physical space. Within that space are eight group study rooms and separate seating for approximately 50 people. There is a small print reference collection of 118 volumes available. There are 36 computers available for all students and faculty. Students at the Greenville campus have access to the same online catalogs and databases as students at the Spartanburg campus. Librarians from USC Upstate are onsite at the Greenville campus at least two days each week.

Accreditation, Approval, Licensure, or Certification

The Mary Black School of Nursing BSN program is accredited by the Commission on Collegiate Nursing Education (CCNE). The University of South Carolina Upstate is accredited by the Southern Association of Colleges and Schools (SACS). The MBSON will apply for and seek approval of this proposed new master's degree program from both accrediting agencies. The proposed curriculum is carefully aligned with the AACN Essentials of Master's Education in Nursing.

The Clinical Nurse Leader (CNL) Certification Program is managed by the Commission on Nurse Certification (CNC), an autonomous arm of AACN, and governed by the CNC Board of Commissioners. CNC recognizes individuals who have demonstrated professional standards and knowledge through CNL certification. Graduates of this new program will be eligible to take the CNL certification exam.

Articulation

The University of South Carolina Upstate will continue to work with our colleague educational institutions across the state to offer seamless transition to our graduate program.

Estimated New Costs

- a. No additional special state appropriations will be requested to implement the Master of Science degree at the University of South Carolina Upstate. The program will be implemented by reallocating current budget and workload, collaborating with USC Aiken for faculty support with each school teaching two courses for the first two semesters. The revenue generated from this program will cover the costs of faculty and staff. Estimated new program costs include an administrative stipend for one (1) tenure track faculty with

a terminal degree for administration of the program. An additional tenure-track faculty with a terminal degree will be hired in the second year to support the ongoing graduate program at a cost of \$78,000, including fringe benefits, for a 9 month contract. There will be no further administrative costs for the program, as it will be administered under the current organizational structure of the USC Upstate Mary Black School of Nursing.

Table D - Estimated Costs to the Institution and Sources of Financing

ESTIMATED COSTS BY YEAR						
CATEGORY	1st	2nd	3rd	4th	5th	TOTALS
Program Administration supplement	\$4,000	\$4,000	\$4,000	\$4,000	\$4,000	\$20,000
Faculty Salaries	\$190,000	\$265,000	\$265,000	\$265,000	\$265,000	\$1,250,000
Graduate Assistants	0	0	0	0	0	0
Clerical/Support Personnel	0	\$26,000	\$26,000	\$26,000	\$26,000	\$104,000
Supplies and Materials	\$2500	\$2500	\$2500	\$2500	\$2500	\$12,500
Library Resources	0	0	0	0	0	0
Equipment	\$2500	\$2500	0	0	0	5000
Facilities	0	0	0	0	0	0
Other (Identify) Marketing	\$2000	\$2000	\$2000	\$2000	\$2000	\$10,000
TOTALS	\$201,000	\$302,000	\$299,500	\$299,500	\$299,500	\$1,401,500

SOURCES OF FINANCING BY YEAR (Specify source(s) (e.g., special item appropriation, auxiliary enterprise funds, endowment income, special grant or contract, etc.)						
Estimated FTE Revenue Generated from the State	0	0	0	0	0	0
Tuition Funding (New students only)	\$147,384	\$294,768	\$393,036	\$442,164	\$491,280	\$1,768,632
Other State Funding	0	0	0	0	0	0
Reallocation of Existing Funds	0	0	0	0	0	0
Federal Funding (will apply for HRSA DON funds)	0	0	0	0	0	0
Other Funding (Program fees)	\$5,130	\$5,130	\$5,130	\$5,130	\$5,130	\$25,650
TOTALS	\$152,514	\$299,898	\$398,166	\$447,294	\$496,410	\$1,794,282

- b. The assumptions made in Table D are based on current faculty /staff resources and allocation of funds and workload. In addition, the collaboration with USC-Aiken enables us to have increased faculty resources eliminating the need for additional faculty, especially in the first year. An administrative supplement will be assigned to a program director for administrative responsibilities related to oversight of program. This faculty member is already employed; therefore, no new faculty recruitment is necessary. An additional faculty member would be added on a nine-month contract in the second year and the added expenses would be absorbed by tuition and fees. Program fees cover clinical supervision.
- c. Materials and supplies would be minimal and focus mainly on marketing and management of the application processes. Equipment is also minimal, since delivery is online and all faculty have the necessary resources, hardware and software, to administer online courses. Faculty development and continuing education would be ongoing through departmental and grant funds.
- d. Financing sources will come primarily from tuition and fees. We do not anticipate any additional funding from the state and plan to seek grant funding through a variety of sources.

Letters of Support

January 17, 2013

Katharine M. Gibb, EdD, MSN, RN
Interim Dean
Mary Black School of
University of South Carolina Upstate
800 University Way
Spartanburg, SC 29303

Dear Dr. Gibb,

I am writing this letter in support of the University of South Carolina Upstate's application for a master's degree in Nursing with the Clinical Nurse Leader (CNL) tract. Although this is a relatively new role to nursing and has only been in existence for five years, it is becoming a vital role in the ever changing healthcare arena.

Currently there is no CNL program in South Carolina and those interested are forced to go to out of state institutions taking tuition dollars with them. Having an expert clinician at the bedside is beneficial for our patients and Quality Care Outcomes.

Greenville Hospital System is committed to a future partnership with Mary Black School of Nursing and the Clinical Nurse Leader (CNL) program tract.

Please let me know if I can help you further as you pursue this new master's degree program.

Sincerely,

Michelle Taylor-Smith, RN, MSN, NE-BC, FACHE
Chief Nursing Officer
Greenville Hospital System

Katharine M. Gibb, EdD, MSN, RN
Interim Dean
Mary Black School of
University of South Carolina Upstate
800 University Way
Spartanburg, SC 29303

Dear Dr. Gibb,

I am writing this letter in support of the University of South Carolina Upstate's application for a master's degree in Nursing with the Clinical Nurse Leader (CNE) track. Clinical expertise is a critical element in the delivery of safe, competent care.

Currently there is no CNE program in South Carolina and those interested are forced to go to out of state institutions taking tuition dollars with them. Having an expert clinician at the bedside is a beneficial for our patients and overall hospital outcomes. The current masters programs in the state focus on the nurse practitioner or educator roles and are not as relevant for the staff nurse or aspiring clinical leader.

This program would be ideal for current nurse leaders or aspiring nurse leaders in our organization. Our organization supports continuing education of our nursing staff and would support them in this program. We would also be willing to be a clinical placement site for students in this program as we currently assist with undergraduate clinical rotations.

Please let me know if I can help you further as you pursue this new master's degree program.

Sincerely,

A handwritten signature in cursive script that reads 'Chanda Flynn'.

University of South Carolina-Upstate
800 University Way
Spartanburg, SC 29303

Dear Dr. Moore:

I am writing this letter in full support of the University of South Carolina-Upstate's application for a master's degree in Nursing with the Clinical Nurse Leader (CNL) tract. Although this is a relatively new role to nursing and has only been in existence for five years, it is becoming a vital role in the ever-changing health care arena.

At the Ralph H. Johnson VAMC in Charleston, we are making plans to incorporate this role into our existing patient care structure. Two of my nurses returned to school this year to become educationally prepared as Clinical Nurse Leaders. Unfortunately, they were forced to go to out of state institutions because there is no graduate program in South Carolina offering this type of master's degree in Nursing.

In my long range planning for patient care, I anticipate hiring a CNL for every nursing unit within the next five years, provided there is enough supply. I would also be willing to be a clinical placement site for students in your program.

Please let me know if I can help you further as you pursue this new master's degree program.

Sincerely,

A handwritten signature in cursive script that reads "Mary C. Fraggos".

Katharine M. Gibb, EdD, MSN, RN
Interim Dean
Mary Black School of Nursing
University of South Carolina Upstate
800 University Way
Spartanburg, SC 29303

Dear Dr. Gibb,

I enthusiastically support the University of South Carolina Upstate's application for a Master's degree in Nursing (MSN) with the Clinical Nurse Leader (CNL) focus. Although this is a relatively new role to nursing, it is becoming a vital role to address pressing needs in the transformative health reform era.

The CNL is a very specialized area of focus developing the skills of the expert clinician at the bedside. As we discussed, CNL students in your program will receive didactic course work in an online format, and 450 hours of clinical at the student's local hospitals with approved preceptors and distance faculty supervision. You have a qualified faculty who is completing her certification as a Clinical Nurse Leader in May who will oversee the clinical competencies and have direct contact with all the clinical preceptors.

USC Upstate has adequate plans in place for faculty coverage to support this program. With your current eleven doctoral faculty and your collaboration with USC Aiken (with an additional eight doctoral faculty) there are adequate resources to accommodate this new program. South Carolina nurses are all working together to address the Institute of Medicine (IOM) recommendation to advance education for nurses in a variety of areas. The unique CNL role provides an excellent avenue to address both the IOM report and local and state needs with this to address quality, safe, and cost-effective health care.

I look forward to collaborating with you with this and other opportunities as we implement innovative models to address the health needs of our state.

Sincerely,

Jeannette O. Andrews PhD, RN, FNP, FAAN

LANDER UNIVERSITY

William Preston Turner School of Nursing

Memorandum of Agreement

This Memorandum of Agreement is made between William Preston Turner School of Nursing, Lander University, Greenwood, South Carolina and Mary Black School of Nursing, USC-Upstate, Spartanburg, South Carolina.

The Master of Science Clinical Nurse Leader (CNL) programs require 400-500 clinical hours. Both Lander University and USC-Upstate must identify appropriate clinical facilities and preceptors for CNL students. Assisting one another in the identification of these sites and appropriate preceptors will be beneficial to both schools and will decrease faculty time and expense in travel to accomplish these tasks. The purpose of this document is to set forth an agreement of collaboration regarding clinical site identifications and supervision of CNL students for the Master of Nursing Clinical Nurse Leader programs at both institutions. During program implementation and delivery, this agreement may be amended, if requested by either institution, as additional means of collaboration are identified.

Each institution agrees to the following collaborative efforts:

- a. To develop and share a clinical site database in the form of an Excel spreadsheet at the end of each semester
- b. To include contact information of clinical sites and names of preceptors appropriate for CNL students in the clinical database
- c. To make on-site supervisory visits of students in designated geographic areas of the state when deemed appropriate by both schools.

The following signatures indicate an agreement to this collaborative arrangement.

Lander University

Robbie South, D.H.Ed., MSN, APRN, PHCNS-BC
Director of William Preston Turner School of Nursing

Signature Robbie South Date 05/13/2013

David Mash, Ph.D.
Vice President of Academic Affairs and Provost

Signature David Mash Date May 13, 2013
