MEMORANDUM

To: Mr. Ken Wingate, Chair, and Members, Commission on Higher Education

From: 
Dr. Bettie Rose Horne, Chair, and Members, Committee on Academic Affairs and Licensing

Annual Report on the Academic Common Market Program Calendar Years 2008 and 2009

Established in 1974 by the Southern Regional Education Board (SREB), the Academic Common Market program was designed "to share between states specified degree programs located at southern public colleges and universities through an exchange of students across borders at in-state rates." As a cooperative agreement among states, the Academic Common Market seeks to eliminate unnecessary duplication of degree programs among states while supporting those programs that are able to serve additional students. The Market allows certified residents of the 16 participating states (Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia) to pay in-state tuition rates while enrolled in certain degree programs at participating out-of-state colleges and universities. Florida, North Carolina, and Texas participate at the graduate level only.

Since one of the goals of the Academic Common Market is to provide access to degree programs not available in the home state, each participating state compiles its own list of programs for access by its residents. In accord with SREB policy, eligible programs are those undergraduate and graduate programs which are at least 50 percent different in course content from programs offered in the home state. Concentrations, options, tracks, or specialization within more general (and otherwise ineligible) degree programs must be extraordinary, specific, and structured to merit eligibility for the Academic Common Market. During annual reviews, each state's Academic Affairs Director decides whether new programs should be added and whether any programs should be removed. In South Carolina, the Academic Common Market institutional coordinators at all the public institutions are asked to review the new program nominations as well as the currently available programs before a decision at the state level is determined. In addition, students can request inclusion of additional programs throughout the year. Such requests are subject to the same approval process as other additions to the Academic Common Market.

In South Carolina, interested students must contact the Commission on Higher Education for access to the Academic Common Market (ACM). This process involves two steps. First, Commission staff must determine whether the student has satisfied the required **one-year** period of residency in the state by using the South Carolina Code of Laws for Determination of Rates of Tuition and Fees (Title 59, Chapter 112). Secondly, the Commission staff must verify that the student is fully admitted to one of the specific programs to which South Carolina residents have ACM access. These programs, 158 undergraduate and 227 graduate, are listed in **Attachment 1**. Once a student is certified, the student retains Academic Common Market status as long as he or she remains enrolled in the same degree program on a full-time basis and retains South Carolina residency.

Beginning in 2008, the SREB initiated a new database system to track all ACM programs and certified students. Because of this new database, the reporting period for ACM data has changed from April through March to the January through December calendar year. In 2008, South Carolina certified 143 residents to go to other SREB states and 175 out-of-state students were certified for South Carolina institutions. In 2009, South Carolina certified 150 state residents to go to other SREB states. During the same period, 290 students from other states were certified for ACM programs at South Carolina institutions. (**Attachment II**)

As seen in the graph below, South Carolina continues to bring into the state more students than it certifies to go out-of-state and this number increased significantly during 2009. It is important to note that these numbers reflect the number of students *certified*, not the actual number of students who finally decided to go out of state.

In 2009, the majority of South Carolina Academic Common Market students were ACM certified for programs in Georgia (52) and Tennessee (34). The two most requested programs by South Carolina applicants were the Aerospace Engineering programs offered at various institutions in Alabama, Mississippi, Tennessee, and Virginia, and the Medical Technology program offered by Armstrong Atlantic State University in Georgia. Each program received 19 South Carolina ACM certifications. The Recording Industry program offered at Middle Tennessee State University received 14 certifications.

In Fall 2009, South Carolina institutions had a total of 462 out-of-state students enrolled with Academic Common Market status. As in previous years, the South Carolina program with the most ACM students was the Bachelor of Science in Marine Science program offered at Coastal Carolina University with a total of 177 ACM certified students (**Attachment III**).

The programs (84) currently made available through the Academic Common Market by South Carolina institutions and the states that have ACM access to those programs are listed in **Attachment IV**.

To advertise this valuable program, which costs the state nothing, the Academic Common Market program information was transmitted electronically this spring to over 250 high school guidance counselors.

This report is being presented for information only.
