1) Out-Of-State Graduates and Information on Performance Scoring: Data on out-of-state students use National Student Loan Clearinghouse data and include those in the cohort who graduated from an out-of-state institution. The percent including the out-of-state is used for Year 9 performance measurement. The percent calculated from CHEMIS data only will be used in calculating the improvement factor because baseline data included only CHEMIS data. IN YEAR 10 NO ADDITIONAL REPORT REQUIRED. Although not required, supplemental reports were received from the 2-Yr Regional campuses. Supplemental data are not available for USC B.

\*Graduate within six years of starting time (through Summer 2004)

\*\*USC-Beaufort is transitioning to 4-yr status and 7E will apply until USC-Beaufort has its first cohort of 4-yr graduates. Until then, this indicator is applied to USC-Beaufort as a transition indicator for Indicator 7A, Graduation Rate.

**NOTE: The data posted here include information available on the SC CHEMIS system and data reported by the regional campuses on out-of-state graduates. For the performance result, both in-state graduates and out-of-state graduates are included. The final column shows the performance result for the current year.**
