Agenda Item 8

October 16, 2014

## **MEMORANDUM**

**To:** Members, Advisory Committee on Academic Programs (ACAP)

**From:** MaryAnn Janosik, Ph.D., Director of Academic Affairs

### **Consideration of Revisions to College Ready Course Prerequisites**

The College Preparatory Course Prerequisite Requirements Task Force was created to review the current (last revised March 2006) *College Preparatory Course Prerequisite Requirements*. The Task Force was directed to align the *College Preparatory Course Prerequisite Requirements* with the high school curriculum and graduation requirements, and to provide the public higher education community with an opportunity to define the appropriate pre-collegiate curriculum necessary to prepare students for college-level coursework. The Task Force met August 25, 2014, and again, on September 17, 2014, to review the current college preparatory requirements, high school graduation requirements, and high school courses offered.

The Task Force recommended changing the name of the prerequisites from "College Preparatory" to "College Ready" in keeping with current language used for successful preparation for college. The Task Force also recommended several revisions to the college ready course prerequisites, which resulted in the following documents that are provided for your consideration:

- A draft of the revised *College Readiness Course Prerequisite Requirements* with tracked changes
- A draft of the revised *College Readiness Course Prerequisite Requirements* without tracked changes
- A draft of a Comparison Chart of Changes in High School Course Prerequisites, which includes current high school graduation requirements, current college preparatory course prerequisites, proposed college ready course prerequisites, and high school courses meeting the proposed prerequisites.

Please note that revisions presented to ACAP for consideration are initial recommendations based on currently approved high school courses and compared to recommendations by College Board and ACT. The Task Force also recommends that the list of high school courses meeting the proposed prerequisites be reviewed on an annual basis.

## **Proposed Revision**

The Task Force chose to make the “College Readiness Course Prerequisite Requirements” document more general in nature and to develop separately a document listing the specific high school courses meeting the prerequisites. Some key changes in the revised document include the following:

- Applied Mathematics I and II were deleted from the approved list as these courses are no longer offered in South Carolina high schools.
- Earth Science was added as a new science field.
- Foreign Language was changed to World Language to reflect the current standards of the American Council on the Teaching of Foreign Languages (ACTFL).
- American Sign Language (ASL) was added to the list of accepted high school courses.
- The number of required electives was increased to two units from one unit.
- Computer science was included as a recommended course in mathematics, science, or an elective with the recommendation that computer science be added as a requirement during the next review and revision cycle.
- A statement was added to the notes that students should prepare themselves for college-level work by enrolling in challenging high school courses, such as honors, Advanced Placement (AP), International Baccalaureate (IB), and dual enrollment courses.
- The total required units were increased to 20 from 19 in order to include the additional elective.

The following chart shows the recommended revisions to the current College Preparatory Course Prerequisite Requirements by subject matter and number of units required.

<b>Subject</b>	<b>Units</b>	
	<i>Current</i>	<i>Proposed</i>
English	4	4
Mathematics	4	4
Laboratory Science	3	3
World Language	2	2
Social Science	3	3
Fine Arts	1	1
Physical Education or ROTC	1	1
Electives	1	2
<b>TOTAL</b>	<b>19</b>	<b>20</b>

## **Recommendation**

Staff recommends that the Advisory Committee on Academic Programs adopt the revised *College Ready Course Prerequisite Requirements* as outlined above, to be phased in for full implementation and applied to entering college freshmen, beginning in Fall 2019.

## College Preparatory College Readiness Course Prerequisite Requirements

Effective Date: Academic Year 2011-12 2019-20

### For Entering College Freshmen

**FOUR UNITS OF ENGLISH:** At least two units must have strong grammar and composition components and, at least two units must be ~~one must be in~~ **English literature**, and at least one must be in literature with one unit in American literature. ~~Completion of College Preparatory English I, II, III, and IV will meet this criterion.~~

**FOUR UNITS OF MATHEMATICS:** These units must include Algebra I ~~(for which Applied Mathematics I and II may count together as a substitute, if a student successfully completes Algebra II)~~, Algebra II, and Geometry. A fourth higher-level mathematics course should be ~~selected from among Algebra III/trigonometry, precalculus, calculus, statistics, discrete mathematics, or a capstone mathematics course and should be~~ taken during the senior year.

**THREE UNITS OF LABORATORY SCIENCE:** Two units must be taken in two different fields of the physical, earth, or life sciences and selected from among **biology, chemistry, ~~or physics, or earth science~~**. The third unit may be from the same field as one of the first two units (**biology, chemistry, earth science, or physics, or earth science**) or from **any laboratory science** for which **biology, and/or chemistry, earth science/physics and/or physics/earth science** is a prerequisite. Courses in ~~earth science, general physical science, or introductory or general environmental science~~ for which **biology and/or chemistry** one of these four courses is **not** a prerequisite will not meet this requirement. ~~It is strongly recommended that students take physical science (taught as a laboratory science) as a prerequisite to the three required units of laboratory science outlined in this section. It is also strongly recommended that students desiring to pursue careers in science, mathematics, engineering or technology take one course~~ in all all three four fields: ~~of~~ biology, chemistry, physics, and earth science.

**TWO UNITS OF THE SAME FOREIGN LANGUAGE WORLD LANGUAGE:** Two units with a heavy emphasis on language acquisition.

**THREE UNITS OF SOCIAL SCIENCE:** One unit of U.S. History, ~~is required;~~ a half unit of **Economics**, and a half unit of ~~and a half unit in~~ **Government** are required. **World History, or Geography** are strongly recommended.

**ONE UNIT OF FINE ARTS:** One unit in Appreciation of, History of, or Performance in one of the fine arts. This unit should be selected from among media/digital arts, dance, music, theater, and visual and spatial arts.

**ONE UNIT OF PHYSICAL EDUCATION OR ROTC.** One unit of physical education to include one semester of personal fitness and another semester is a lifetime fitness. Exemption applies to students enrolled in Junior ROTC and for students exempted because of physical disability or for religious reasons.

**TWO UNITS OF ELECTIVES:** One-Two units must be taken as ~~an~~ electives. A college preparatory course in **Computer Science\*** (i.e., one involving significant programming content, not simply keyboarding or using applications) is strongly recommended for this elective. Other acceptable electives include college preparatory courses in **English; fine arts; foreign languages; social science; humanities; mathematics; physical education; and laboratory science** (~~excluding earth science,~~

~~general physical science, general environmental science, or other introductory science~~ courses for which biology, ~~and/or chemistry, physics, or earth science~~ is ~~not~~ a prerequisite); ~~or mathematics above the level of Algebra II.~~

~~\*Computer Science will be recommended as a requirement during the next review and revision cycle.~~

~~ONE UNIT OF PHYSICAL EDUCATION OR ROTC~~

Total: ~~19-20~~

## NOTES

1. Each institution may make exceptions in admitting ~~(a)~~ students who do not meet all of the prerequisites, limited to those individual cases in which the failure to meet one or more prerequisites is due to circumstances beyond the reasonable control of the student; ~~or, (b) students who have taken the Tech Prep (Applied Academics) courses rather than the required college preparatory curriculum described above and who meet all other institutional admissions criteria.~~
2. The College Preparatory Course Prerequisite Requirements are minimal requirements for four-year public college admission. Therefore, students should check early with colleges of their choice to plan to meet additional high school prerequisites that might be required for admission and to prepare for college entrance examinations.
3. Students should prepare themselves for college-level work by enrolling in challenging high school courses, such as honors, Advanced Placement (AP), International Baccalaureate (IB), and dual enrollment courses.
4. It is the responsibility of each school district to disseminate this set of requirements to entering freshmen students interested in pursuing a four-year college degree in South Carolina upon graduation from high school and to provide the web address for their viewing: [http://www.che.sc.gov/New\\_Web/GoingToCollege/CollPrepPrereq.htm](http://www.che.sc.gov/New_Web/GoingToCollege/CollPrepPrereq.htm). **Please note the    (underscore) character between the words "New" and "Web" in the URL.**
5. This revision of the College Preparatory Course Prerequisite Requirements shall be fully implemented for students entering colleges and universities as freshmen beginning in Fall ~~2014~~2019. In the interim period, ~~either~~ the ~~2003-04~~2011-12 version of the Prerequisites or the version approved by the Commission on October 5, 2006, is acceptable.
- ~~5-6.~~ The next revision cycle should begin in Fall 2020.

Approved by CHE  
October 5, 2006
