Comparison of Terminated and Approved Academic Degree Programs, Program Concentrations, Sites, and Certificates

The previous tables show that academic degree programs, program concentrations, sites, and certificate programs terminated and approved encompass several different fields. Table 9 compares the number of academic degree programs, program concentrations, and sites terminated with the number of those approved and added by curricular area. Table 10 compares the number of academic degree programs, program concentrations, sites, and certificate programs terminated with the number of those approved and added by institution while Tables 11, 12, and 13 compare the same information by category and type of institution, respectively. These tables also include the concentrations and sites terminated or added as a result of program modifications.

Comparison of Terminated and Approved Academic Degree Programs, Program Concentrations, Sites, and Certificates by Year

The following chart compares the number of academic degree programs, program concentrations, sites, and certificate programs terminated with the number of those approved by year for the past few years.

Figure 2. Terminated and Approved Academic Degree Programs, Program Concentrations, Sites, and Certificates by Year

Note: Total programs refer to Academic Degree Programs, Program Concentrations, and Sites.

During the 2012-13 year, there was an increase in the total number of programs, program concentrations, sites, and certificates approved. There was also a significant increase in the number of academic degree programs approved. It is worth noting that overall, both program approval and termination activity has increased over the past few years. However, the largest increase in both academic degree and total program terminations occurred in FY 2009-10, most likely as a result of the economic recession.
