# Recommended Dual Enrollment / Dual Credit Courses

## Purpose

This guide is meant to assist high school students taking "dual enrollment" or "dual credit" courses to see options for how their work will transfer toward the degree to a South Carolina four-year public institution upon graduation from high school. Students should only take what is necessary for a degree, rather than repeating courses which are similar to or identical to ones already taken through dual enrollment. To develop this guide, the South Carolina Commission on Higher Education surveyed all four-year public institutions regarding the transfer of general education courses. Therefore, this guide lists the courses that will transfer towards the respective degree at any four-year public institution in the state.

## Who Should Use this Guide?

Any student taking dual enrollment coursework in a South Carolina high school who wants to enroll in a South Carolina four-year public institution of higher education and:

- Knows the general area of curricular focus; but
- does not know what major to take and
- has not yet been accepted into a four-year institution.

Students who have already been accepted into an institution should consult that institution's general education advisor or appropriate departmental advisor.

## How to Use this Guide

There are five groups of recommended courses listed in this guide. Each group corresponds to a broad area of the postsecondary curriculum. If admitted to a four-year public institution in South Carolina and to a major program of study, the student may apply all courses listed in one of these groups to graduation requirements for that major. For example, if a student needs 120 credits hours in her chosen major of History and completes the 11 courses (i.e. 36 credits hours) included in the list of recommended courses for Arts, Humanities, and Social Sciences, the student will be guaranteed to have only 84 credit hours remaining to complete a baccalaureate degree.
