

PROGRAM MODIFICATION PROPOSAL FORM

Name of Institution: UNIVERSITY OF SOUTH CAROLINA AIKEN (USC AIKEN)

Briefly state the nature of the proposed modification (e.g., adding a new concentration, extending the program to a new site, curriculum change, etc.): Curriculum Change

Current Name of Program (include degree designation and all concentrations, options, and tracks): Multi-Categorical Special Education (K-12); B.A. in Special Education

Proposed Name of Program (include degree designation and all concentrations, options, and tracks): Multi-Categorical Special Education (K-12); B.A. in Special Education

Program Designation:

- | | |
|---|--|
| <input type="checkbox"/> Associate's Degree | <input type="checkbox"/> Master's Degree |
| <input checked="" type="checkbox"/> Bachelor's Degree: 4 Year | <input type="checkbox"/> Specialist |
| <input type="checkbox"/> Bachelor's Degree: 5 Year | <input type="checkbox"/> Doctoral Degree: Research/Scholarship (e.g., Ph.D. and DMA) |
| <input type="checkbox"/> Doctoral Degree: Professional Practice (e.g., Ed.D., D.N.P., J.D., Pharm.D., and M.D.) | |

Does the program currently qualify for supplemental Palmetto Fellows and LIFE Scholarship awards?

- Yes
 No

If No, should the program be considered for supplemental Palmetto Fellows and LIFE Scholarship awards?

- Yes
 No

Proposed Date of Implementation: Fall 2020

CIP Code: 131001

Current delivery site(s) and modes: USC AIKEN campus
USC AIKEN campus students participate in the traditional/face-to-face (F2F) program. USC AIKEN Palmetto College students complete the program specific coursework in an online format. Therefore, we are a traditional/F2F and distance education program.

Proposed delivery site(s) and modes: USC Aiken campus
This will remain the same as described above. USC AIKEN campus students will participate in the traditional/face-to-face (F2F) program. USC AIKEN Palmetto College students will complete the program specific coursework (73 hours) in an online format. Therefore, we are a traditional/F2F and distance education program.

Program Contact Information (name, title, telephone number, and email address):

ACAP	
CAAL	
CHE/SCDE	

Background Information

Provide a detailed description of the proposed modification, including target audience, centrality to institutional mission, and relation to strategic plan.

After an analysis of the required national Council for Exceptional Children (CEC) standards, a comparison of other SC universities offering similar programs, an evaluation of program requirements established by the South Carolina Department of Education (matrices available upon request), and Praxis test data (state certification tests), we have determined that we cannot keep up with the changing nature of special education and the changing requirements without including additional academic content to our coursework. Thus, the proposed new courses will address current gaps in our practices, as well as become more aligned to other programs in the state.

The special education faculty developed a curriculum map for our program which is aligned to the CEC standards. After identifying some gaps, the new proposed courses were identified and developed. The major assessments in these new courses will also be used for assessment purposes for the Council for the Accreditation of Educator Preparation (CAEP) & CEC accreditation. In the National Recognition Report (dated fall 2018), the reviewers noted that our Special Education Multi-categorical program has a gap in the “preponderance of the performance data for each of the CEC Preparation Standards...” The program restructuring and new coursework will better meet the needs of our preservice candidates and the national accreditation standards.

The USC AIKEN School of Education currently offers a K-12 multi-categorical special education program. The proposed program modification outlined consists of replacing 32 credit hours of coursework with 30 credit hours of new coursework. Because these changes reflect only 62 credit hours (which is less than 50% of our current program), we are requesting a program modification. The modified program has a total required credit hours of 126, compared to the 128-132 required hours for the old program.

The modified program will provide students the knowledge and skills to teach academic content, as well as assessment, behavioral, and social skills strategies. This includes new courses about planning instruction and teaching students with disabilities in specific content areas (e.g., reading, writing, math) using evidence-based practices.

The focus of the multi-categorical program will be teaching students to use evidence-based practices to teach all students with exceptionalities and different learning needs. These skills and content knowledge are critical for all K-12 educators. With the inclusion movement, more and more special educators are being asked to co-teach in general education classrooms. Our preservice teachers must be able to plan and teach (and adapt) academic content (e.g., reading, writing, and math - grades K-12), as well as manage behavior, assess student strengths and needs, and collaborate with families and other professionals. The new proposed courses will provide our preservice teachers with the knowledge and skills in order to be effective special educators.

Our target audience will continue to include preservice teachers who would like to gain the knowledge and skills to teach K-12 students with special needs/exceptionalities. USC AIKEN has the unique opportunity to reach students from around the state as we have both a F2F program and a program through Palmetto College, which provides the coursework related to the major online. This will increase our potential impact.

USC AIKEN's mission is “grounded in strong a liberal arts curriculum,” hence the large number of required general education coursework proposed for this new program. Moreover, USC AIKEN values “high impact learning practices, undergraduate research, small classes, and individual attention.” This program will provide opportunities for students to participate in small class (F2F and online) to learn through the use of high impact practices (HIP).

USC AIKEN's 2018-2023 strategic plan includes utilizing HIP throughout learning, which includes undergraduate research, classroom engagement, and cross-disciplinary collaboration. Our proposed program would not only include these practices, it will also help students learn how to implement these practices in their K-12 classrooms.

Assessment of Need

Provide an assessment of the need for the program modification for the institution, the state, the region, and beyond, if applicable.

Special Education is on the critical needs list for both South Carolina and the United States thus making teacher candidates eligible for loan forgiveness. The Center for Educator Recruitment, Retention and Advancement Supply and Demand Report, Fall 2018 (CERRA) noted 105 vacancies in special education teaching positions in South Carolina at the start of the 2018-19 academic year. Additionally, a larger number of vacancies are shown to be filled by alternatively certified teachers who have a greater likelihood of leaving within the first 3 years of employment. The American Association for Employment in Education classifies the shortage in special education teachers as ‘considerable’ – their highest level.

Transfer and Articulation

Identify any special articulation agreements for the modified proposed program. Provide the articulation agreement or Memorandum of Agreement/Understanding.

The state-wide articulated 2+2 agreements with the technical colleges and 2 year campuses of the USC system.

Description of the Program

Projected Enrollment						
Year	Fall Headcount		Spring Headcount		Summer Headcount	
	New	Total	New	Total	New	Total
2020-2021	3	40	3	40	0	0
2021-2022	8	45	8	45	0	0
2022-2023	13	50	13	50	0	0
2023-2024	13	50	13	50	0	0

Explain how the enrollment projections were calculated.

These projections were calculated based on previous enrollments. Please see the table above. Our average enrollment across the five years (2015-current) has been about 37 students. We anticipate a slight increase in enrollment due to recruitment efforts by USC System Palmetto College and USC Aiken School of Education.

Curriculum

Attach a curriculum sheet identifying the courses required for the program.

We are proposing the completion of a 6-credit hour practicum to occur the fall of senior year. This will take the place of five 1-credit hour practicums previously required in our program. The new 6 credit hour practicum will still provide students the opportunities to practice the knowledge and skills from the old 1-hour practicum courses. The new practicum will require students to be immersed in a school and classroom at the beginning of the school year when much of the planning for behavior management and routines occurs. This would be invaluable for our candidates. It

also allows students to receive structured, regular feedback from special education faculty about their management and teaching before internship (which usually occurs spring of senior year).

Because our candidates will be certified to teach K-12 multi-categorical special education, we will also be tracking the placements (practicums and internship) of our teacher candidates across their time in our program. It is important for students to observe and learn in a variety of grade levels (elementary, middle, high), as well as classroom settings (e.g., inclusion general education, resource, and self-contained classrooms). The new proposed 6-credit hour course will also allow students to work in a grade-level or setting that perhaps is new to them. Currently, our students complete a series of 1 credit-hour practicums. This has proven problematic as some students only attend their practicums for 3-4 full days each semester to complete all of the hours. The 6-credit hour practicum would help solve some of these current challenges by requiring students to attend across an entire semester in order to build rapport with K-12 students, practice implementing evidence-based practices and behavior management plans, and receive valuable feedback from their cooperating teachers and special education faculty.

Curriculum Changes:

Overall Required Hours: 128-132 Education Required Hours: 75	Overall Required Hours: 126 Education Required Hours: 73

***New courses are in bold and italicized**

New Courses

Course Title	Course Description
EDEX A336 Planning Effective Instruction for Students with Disabilities	This course will explore how to teach students with exceptionalities using evidence-based practices. Lesson planning and instructional designs will also be explored. Additionally, instructional plans that meet the diverse needs of learners and utilize evidence-based practices will be developed.
EDEX A451 Communication & Language Development	This course will explore communication and language development in students throughout the lifespan. This includes methods to teach writing (K-12) to students with disabilities. Evidence-based practices will

	be explored and implemented. Topics include the process approach to writing, spelling, and handwriting throughout K-12 grades. Analyzing data to make instructional-based decisions will also be practiced.
EDEX A452 Teaching Reading to Students with Disabilities	This course will explore methods to teach reading (K-12) to students with disabilities. Evidence-based practices will be explored and implemented. Topics include teaching phonics, fluency, comprehension, and vocabulary throughout K-12 grades. Analyzing data to make instructional-based decisions will also be practiced. Additionally, students will participate in a practicum to practice the skills related to planning and implementing effective instruction to diverse learners.
EDEX A453 Collaboration, Families, & Early Intervention	This course will explore the impact of families on the diagnosis and acceptance of disabilities, as well as ways to collaborate with families. Collaboration with other professionals will also be explored including co-teaching methods. Early intervention services and ethics will be analyzed.
EDEX A454 Teaching Math to Students with Disabilities	This course will explore methods to teach math (K-12) to students with disabilities. Evidence-based practices will be explored and implemented. Academic content includes the following topics: numbers and operations, place value, geometry, measurement, decimals, fractions, problem solving, and skills on how to adapt these standards to teach diverse learners. Analyzing data to make instructional-based decisions will also be practiced. Additionally, students will participate in a practicum to practice the skills related to planning and implementing effective instruction to diverse learners.
EDEX A455 Social Studies & Science Methods for Students with Disabilities	This course will explore methods to teach science and social studies content (K-12) to students with disabilities. Evidence-based practices will be explored and analyzed to meet the needs of various learners.
EDEX A456 Secondary Methods & Transition	This course will explore teaching methods for middle and high school students with disabilities. Evidence-based practices will be explored, as well as transition services and writing Individualized Education Plans (IEPs). Topics include study skills, transition services, community settings, postsecondary life, IEPs, and transition plans.
EDEX A457 Practicum in High & Low Incidence Disabilities	Practicum observation and teaching in the public schools under the supervision of certified special education teachers and university personnel, which will include field experiences in the application of methods and materials for teaching students with high and low incidence disabilities. Experiences will be in diverse settings (e.g., co-taught inclusion, resources, and self-contained classrooms) and will prepare students for a semester-long internship.

Similar Programs in South Carolina offered by Public and Independent Institutions

Identify the similar programs offered and describe the similarities and differences for each program.

Program Name and Designation	Total Credit Hours	Institution	Similarities	Differences
B.S. Special Education	120.50	Lander University	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	Students are required to take elementary math methods and either social studies or science coursework in elementary education. They are not required to complete these method courses specific for students with disabilities. USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.S. Special Education	122.00 minimum	College of Charleston	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	Students complete methods courses in elementary education instead of special education. They also complete courses related to characteristics of learning disabilities, intellectual disabilities, and/or emotional disabilities. USCA's proposed program will cover characteristics of disabilities in EDEX 336 - Planning Effective Instruction for Students with High and Low Incidence Disabilities, as well as throughout the methods courses (e.g., teaching self-regulation in math).
B.A. Special Education	123.00	Clemson University	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	Students complete science and social studies methods in elementary education. USCA's new program will offer a course about how to teach this content to students with disabilities. Our early intervention course will also include strategies for working with families and other

				professionals (collaboration). Program does not offer a course specific for language and communication.
B.S. Special Education	123.00	Anderson University	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.S. Special Education	129.00 minimum	Bob Jones University	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.A. Special Education	120.00 minimum	Coastal Carolina University	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.A. Special Education	76.00	Columbia College	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.A. Comprehensive Special Education	125.00 minimum	Converse College	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.S. Special Education	124.00 minimum	Erskine College	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.S. Special Education	125.00	Southern Wesleyan	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.
B.S. Special Education	120-124	Winthrop University	Courses included in program are similar due to the Council for Exceptional Children (CEC) standards	USC AIKEN's new courses related to math, communication/language, and science and social studies will be specific to students with disabilities.

Faculty

State whether new faculty, staff or administrative personnel are needed to implement the program modification; if so, discuss the plan and timeline for hiring the personnel. Provide a brief explanation of any personnel reassignment as a result of the proposed program modification.

USC AIKEN currently has three full-time faculty members in special education. We do not anticipate adding additional faculty at this time. We also do not anticipate the need to reassign faculty or staff.

The current Special Education Coordinator will continue administrative duties related to this program. The School of Education also has two administrative assistants who help with these duties, as well.

Resources

Identify new library, instructional equipment and facilities needed to support the modified program.

Library Resources: USC AIKEN has the Gregg-Graniteville Library located on campus. This library “strives to provide the academic community with the information required for intellectual, professional, and personal development.” To help with this mission, the library offers study rooms throughout the building, as well as a variety of services (e.g., circulation, library instruction, interlibrary loan). It also offers “Ask a Librarian” in which students can make an appointment to chat with a librarian via phone, email, or chat feature. Additionally, our library provides access to books and media, databases, research guides, and e-journals. many of which are related to special education. The databases function is useful for undergraduate students who are examining research. The online website for the library is also helpful as many of our students participate in distance education (through Palmetto College).

No additional library resources are needed at this time.

Equipment: Some new instructional materials will be needed for the proposed program. Specifically, the School of Education requests the purchase of iPads and special education apps (e.g., Proloquo2Go). Additionally, several curriculums (e.g., social skills training, transition skills) are needed in order for students to practice teaching skills authentically.

5 iPads, 32GB with wifi: \$329 each x 5 = \$1645
Proloquo2Go App: \$250 each x 5 = \$1250

Facilities: Identify the physical facilities needed to support the program and the institution’s plan for meeting the requirements.

USC AIKEN’s School of Education is housed in the Business & Education (B&E) building on campus. The old special education program is already located in this building, so we are proposing that the new program stay at this location.

Impact on Existing Programs

Will the proposed program impact existing degree programs or services at the institution (e.g., course offerings or enrollment)? If yes, explain

Yes = the existing program program courses will be phased out as new students enroll in the new program. Current students will transition to the new program.

No

Financial Support

Estimated Sources of Financing for the New Costs						
Category	1st	2nd	3rd	4th	5th	Total
Tuition Funding	31,194	83,184	135,174	135,174	135,174	519,900
Program-Specific Fees	300	800	1300	1300	1300	5000
Special State Appropriation						
Reallocation of Existing Funds						
Federal, Grant, or Other Funding						
Total	31,494	83,984	136,474	136,474	136,474	524,900
Estimated New Costs by Year						
Category	1st	2nd	3rd	4th	5th	Total
Program Administration and Faculty and Staff Salaries						
Facilities, Equipment, Supplies, and Materials	2,895					2,895
Library Resources						
Other (specify)						
Total	2,895					
Net Total (i.e., Sources of Financing Minus Estimated New Costs)	28,599	83,984	136,474	136,474	136,474	522,005

Budget Justification

A modest increase in students is expected after this modification. Tuition for each semester is calculated as \$5199/student. For example: 3 new students in year 1 = \$5199 x 3 students x 2 semesters = \$31,194. Additionally, education majors have a \$50 fee per semester to help defray costs for field experience supervision.

Some new instructional materials will be needed for the proposed program. Specifically, the School of Education requests the purchase of iPads and special education apps (e.g., Proloquo2Go). Additionally, several curriculums (e.g., social skills training, transition skills) are needed in order for students to practice teaching skills authentically. There will be no change in faculty, staff, or facilities.

5 iPads, 32GB with wifi: \$329 each x 5 = \$1645

Proloquo2Go App: \$250 each x 5 = \$1250

Evaluation and Assessment

Program Objectives	Student Learning Outcomes Aligned to Program Objectives	Methods of Assessment
<p>1.0 Beginning special education professionals understand how exceptionalities may interact with development and learning and use this knowledge to provide meaningful and challenging learning experiences for individuals with exceptionalities.</p>	<p>1.1 Beginning special education professionals understand how language, culture, and family background influence the learning of individuals with exceptionalities.</p> <p>1.2 Beginning special education professionals use understanding of development and individual differences to respond to the needs of individuals with exceptionalities</p>	<p>Universally Designed Lesson Plan Project Students will develop a Universally Designed lesson plan (UDLP) for a case study student using the principles of effective instruction. related to implementation of lesson plans and instruction.

Math Mini-Unit

Students will develop three lesson plans for students in a field placement (as part of class time) in the area of math.

Lesson plans will be connected to SC state standards and Individualized Education Plan goals. Appropriate accommodations, modifications, and adapted materials will be identified and described.

Students will utilize and identify the principles of instruction used throughout the plan.

Assessments that are aligned to lesson objectives will also be developed. Students will teach these lessons in order to receive feedback related to implementation of lesson plans and instruction.

Co-Taught Lesson & Demonstration

Students will develop a co-taught lesson plan appropriate for middle or high school in small groups. Then, students will present their lesson to an inclusion classroom in the field. Students will receive feedback related to implementation of lesson plans and instruction.

Transition & Individualized Education Plan Project

Students will develop a Transition Plan and Individualized Education Plan for a high school case study student. Students will utilize data to make informed decisions and connect the plans to present levels of performance and post-secondary goals.

Behavior Intervention Plan Project

Students will complete a Functional Behavioral Analysis project. Students will define a problem behavior, collect data,

		<p>and design an intervention related to student behavior. Then, students will develop a Behavior Intervention Plan and write Individualized Education Plan goals.</p>
<p>5.0 Beginning special education professionals select, adapt, and use a repertoire of evidence-based instructional strategies to advance learning of individuals with exceptionalities.</p>	<p>5.1 Beginning special education professionals consider individual abilities, interests, learning environments, and cultural and linguistic factors in the selection, development, and adaptation of learning experiences for individuals with exceptionalities.</p> <p>5.2 Beginning special education professionals use technologies to support instructional assessment, planning, and delivery for individuals with exceptionalities.</p> <p>5.3 Beginning special education professionals are familiar with augmentative and alternative communication systems and a variety of assistive technologies to support the communication and learning of individuals with exceptionalities.</p> <p>5.4 Beginning special education professionals use strategies to enhance language development and communication skills of individuals with exceptionalities.</p> <p>5.5 Beginning special education professionals develop and implement a variety of education and transition plans for individuals with exceptionalities across a wide range of settings and different learning experiences in collaboration with individuals, families, and teams.</p> <p>5.6 Beginning special education professionals teach to mastery and promote generalization of learning.</p> <p>5.7 Beginning special education professionals teach cross-disciplinary knowledge and skills such as critical thinking and</p>	<p>Universally Designed Lesson Plan Project Students will develop a Universally Designed lesson plan (UDLP) for a case study student using the principles of effective instruction. Additionally, students will develop a classroom environment plan to accompany this UDLP to promote accessibility for all learners.</p> <p>Writing CBM Case Study Analysis Students will analyze a case study related to written expression. They will analyze baseline and intervention data to develop appropriate goals and make instructional based decisions.</p> <p>Reading Mini-Unit Students will develop three lesson plans for students in a field placement (as part of class time) in the area of reading. Lesson plans will be connected to SC state standards and Individualized Education Plan goals. Appropriate accommodations, modifications, and adapted materials will be identified and described. Students will utilize and identify the principles of instruction used throughout the plan. Assessments that are aligned to lesson objectives will also be developed. Students will teach these lessons in order to receive feedback related to implementation of lesson plans and instruction.</p> <p>Math Mini-Unit Students will develop three lesson plans for students in a field placement (as part of class time) in the area of math.</p>

Agenda Item 31

Students will receive feedback related to implementation of lesson plans and instruction.

Transition & Individualized Education Plan Project

Students will develop a Transition Plan and Individualized Education Plan for a high school case study student. Students will utilize data to make informed decisions and connect the plans to present levels of performance and post-secondary goals.

Behavior Intervention Plan Project

Students will complete a Functional Behavioral Analysis project. Students will define a problem behavior, collect data, and design an intervention related to student behavior. Then, students will develop a Behavior Intervention Plan and write Individualized Education Plan goals.

Will any the proposed modification impact the way the program is evaluated and assessed? If yes, explain.

- Yes
 No

Will the proposed modification affect or result in program-specific accreditation? If yes, explain; and, if the modification will result in the program seeking program-specific accreditation, provide the institution's plans to seek accreditation, including the expected timeline.

- Yes = see attached SCDE New Program Proposal
 No

Will the proposed modification affect or lead to licensure or certification? If yes, identify the licensure or certification.

- Yes = multi-categorical special education (K-12)
 No

Explain how the program will prepare students for this licensure or certification.

If the program is an Educator Preparation Program, does the proposed certification area require national recognition from a Specialized Professional Association (SPA)? If yes, describe the institution's plans to seek national recognition, including the expected timeline.

- Yes = see attached SCDE New Program Proposal
 No
